FIELD	VALUE
Document ID	PROG-01
Purpose in this pack	The institution described in one document: the business model the framework governs. Published for coherence of the benchmark universe. This is a description of operations, not an authorisation filing.
Data	All figures reconcile to the master profile file (mynta-profile.yaml). On any divergence, that file prevails.

1 · The institution

Mynta AB is a Swedish e-money institution, authorised in 2018, supervised by Finansinspektionen, headquartered in Stockholm, 118 employees. It serves 152,400 consumers and 7,340 business customers, of which 620 are acquiring merchants. 2025 processed volume: SEK 38.2bn. Revenue SEK 412m; operating result SEK 31m.

2 · Services

SERVICE	DESCRIPTION	2025 VOLUME
E-money accounts and payments	Consumer and business accounts, SEPA and domestic payments, SEK and EUR	SEK 21.4bn
Card issuing	Consumer and corporate debit cards under a BIN sponsor arrangement; 96,000 active cards	SEK 3.6bn
Merchant acquiring	E-commerce only, 620 merchants, no point-of-sale	SEK 11.9bn
Crypto distribution		SEK 1.3bn

On- and off-Crypto Service to approved listed crypto-assets,
provided by Mynta Digital AB (group CASP, authorised 2026) with
Mynta AB as distributor and fiat product area

Mynta operates no cash services, no branches, no agents, no correspondent relationships and no trade finance. Onboarding is fully remote. Occasional transactions for non-customers are not offered.

3 · Customers and geography

Customer base: 68% Sweden, 29% rest of EEA, 3% non-EEA. Merchant ownership chains reach approximately 40 jurisdictions; 18,900 consumers and 41 business customers are crypto-active. Monthly activity: 3,900 consumer onboardings, 140 business, 18 acquiring; 2,150 monitoring alerts; 5,400 screening name hits; 610 periodic reviews.

4 · Organisation and control

Governance follows GOV-02 section 5: board, designated executive, and the central function holder with a compliance function of eleven. Three lines of defence per GOV-02 section 5.4; independent examination per GOV-06. The operational model is procedure-driven: the SOP series defines execution, REG-C holds operating values, and Kompass is the system of record for casework.

5 · Material third parties and outsourcing

CardPartner Europe Ltd (BIN sponsor), Norrbank AB (safeguarding of customer funds, average SEK 1,870m), a screening vendor and an identity vendor, governed under GOV-08. Group services with Mynta Digital AB are documented between the entities per GOV-02 section 12. Responsibility for regulatory compliance is never outsourced.

6 · Group boundary

Mynta Digital AB holds its own CASP authorisation and maintains its own regulatory documentation, including custody, transfer-service and market-conduct frameworks, under MiCA and its technical standards. That framework is internal to the group and outside this published pack. The interface Mynta AB operates (distribution, fiat product area, travel-rule data flows, coordination) is governed by the documents in this pack, principally GOV-02 section 12, SOP-17 and REG-C C-8.

7 · Financial and prudential arrangements

Own funds, capital monitoring, safeguarding arrangements and financial control operate under the internal documents listed in REG-D (prudential and capital monitoring policy, accounting and financial control policy, GOV-05 safeguarding). Safeguarded customer funds are held at Norrbank AB under the segregation method with daily reconciliation.

8 · Forward plan

The operating plan is continuity: the four service lines at current scale, AMLR re-baselining through SOP-25 ahead of July 2027, and no new products or markets without GOV-09 assessment. Growth assumptions in planning are deliberately modest and carry no dependency in this framework.

What the FI application contains

A licence application to Finansinspektionen is submitted in Swedish. Where the working documents are in English, the full pack is translated before filing; practice has tightened on this. The business plan for a new institution typically lands at 30 to 40 pages, describing each requirement briefly and referring to the full document for the detail. The table maps the application contents to where each part lives.

APPLICATION COMPONENT	WHERE IT LIVES
Detailed description of the e-money activities	PROG-01 and GOV documents
Detailed description of each payment service	PROG-01
Process and funds-flow charts for all services	PROG-01, charts on the internal shelf
Organisation chart, responsibilities and reporting lines	PROG-01 and GOV-09
Compliance function	GOV documents
Risk management and risk control functions	GOV-01 and GOV documents
Internal audit arrangements	GOV-06
AML/CTF procedures and the general risk assessment	GOV-01, GOV-02 and the SOPs
Funds-transfer information controls	SOP-17 and SOP-18
Safeguarding and reconciliation arrangements	GOV-05 and the internal shelf
Outsourcing, oversight and material agreements	GOV-08
Cross-border services, passporting and distributors	Internal shelf
ICT systems, DORA and data protection	GOV-07 and GOV-08
Access controls for sensitive payment data	GOV-07 and SOP-20 access rules
Operational and security risk management	GOV documents
Incident handling and reporting	GOV-02 section 14
Critical functions and business continuity	Internal shelf
Complaints handling	OP-01
Fraud monitoring and statistics	SOP-18 and OP documents
Other group activities and separation from the EMI	GOV-02 section 12
Three-year financial forecasts, capital and own funds	Outside this pack, required in the full application
