

GOV-04: Customer risk appetite statement

Company	Mynta AB
Last approval date	2026-09-10
Approved by	Board
Document type	Policy
Document owner	MLRO
Information class	Open internally, confidential externally

Versioning

DATE	VERSION	CHANGES	BY
2026-09-07	1.x	Earlier versions per the change notes in this document	Document owner
2026-09-10	2.0	Rewritten in plain language. No rules changed.	Document owner

FIELD	VALUE
Document ID	GOV-04
Enforced through	SOP-10 S1.3, SOP-15, C-6, C-7, C-8; declined register

1 · Purpose

This statement says which customers and activities Mynta accepts and which it does not, decided in advance, so that the answer never depends on commercial pressure in an individual customer case. Onboarding, product decisions and periodic review shall all follow it. Prohibited means the customer is declined, at whatever stage the ground is discovered, and no one at any level can grant an exception. Restricted means the customer can be accepted only when the stated conditions are met. The lists derive from GOV-01's assessment and the board's tolerance; changing them is a board decision through this document, never a file-level judgement.

2 · Prohibited

Mynta does not onboard, and exits on discovery:

- Shell banks, and institutions permitting their accounts to be used by shell banks.
- Unlicensed money-service businesses and unlicensed crypto-asset service providers, in any jurisdiction where their activity requires a licence.
- Companies that have issued bearer shares. Exception: the shares are deposited with a regulated custodian so ownership can be verified, and this is documented to SOP-10 standards.
- Companies using nominee shareholders or nominee directors, where the real principals are not fully disclosed and documented to SOP-10 standards. Where this means due diligence cannot be completed, the law itself already prohibits the relationship; this line restates it as appetite.

- Companies whose ownership or control cannot be established. Where due diligence cannot be completed, the relationship may not be entered or maintained, per the statutory prohibition restated in GOV-02 section 7.7.
- Any person or company connected to a prohibited jurisdiction per C-2, at any level of the ownership structure.
- Trusts and comparable foreign legal arrangements as acquiring customers. As account customers they are not prohibited but restricted: see section 3, MLRO pre-approval per SOP-10 section 5.
- Business lines: unlicensed gambling; weapons and ammunition; trade in dual-use goods without the required export licences; adult live-streaming services. Other adult-industry business is not prohibited but restricted, see section 3. Sanctions prohibitions are not restated here: they apply directly by law, per GOV-03.
- Products used without a completed identity check. No product is activated before due diligence is completed.

3 · Restricted, held only under conditions

CATEGORY	CONDITION
Licensed gambling	the standard category licence jurisdictions only per C-7; licence verified and monitored; acquiring only with SOP-15 enhanced review
Licensed PSPs, EMIs and MSBs	Licence verified; purpose of the relationship stated; EDD; the institution's own customers must be identified, no anonymous end users
Adult-industry business (other than live-streaming)	Licensed and lawful only; enhanced monitoring; MLRO approval; scheme rules complied with. An appetite choice, not a legal requirement
Crypto-sector businesses	Licensed only; EDD always; access to the crypto on-Crypto Service is a separate decision per SOP-10 Appendix E; volume caps per section 4
Non-profit organisations	Case-by-case, MLRO decision; purpose, funding and cross-border flow transparency required
Complex or cross-border structures	Held only with full evidence for every level of the ownership structure; where risk is high, each layer is examined per C-3; EDD per C-9; decision authority per C-6
PEP relationships	Per SOP-10 section 8: approval by the authorised senior decision-maker the governance framework designates, source of wealth and funds measures, enhanced monitoring
the high-risk category connection	EDD and MLRO decision always; cross-border flow monitoring per SOP-18

4 · Product and concentration appetite

- **No cash.** Mynta offers no cash services. The only cash touchpoint is ATM withdrawals with issued cards, inside SOP-16 limits.
- **Crypto limits.** Crypto Service volume is capped at 5% of institutional processed volume and per-customer per risk class per C-8's register values; tokens are approved listed per C-8 with

additions only through GOV-09. Breaching a bound suspends Crypto Service growth per GOV-01 conclusion C3.

- **Acquiring concentration.** No single merchant above 4% of institutional processed volume without board notification; no MCC category above 20% of acquiring volume without MLRO review of the concentration.
- **Cross-border flow concentration.** Sustained cross-border flow patterns inconsistent with the customer base's profile trigger review under SOP-18 and, where structural, a GOV-01 event review.
- **Combinations.** Where several risk factors combine, they are assessed jointly, not by simply taking the strictest single rule; the joint assessment can land stricter than any single factor. One combination is outside appetite entirely: a complex structure, plus the high-risk category connection, plus crypto-dominant expected activity.

5 · Appetite metrics

The limits below quantify the statement and are monitored quarterly. Breach of a metric is reported in the MLRO report with a correction path; sustained breach routes to the board.

METRIC	BOUND	MEASURED
High-risk share of active customers	At or below 6%	Quarterly, per SOP-14 class data
the high-risk category connection share of active customers	At or below 1.5%	Quarterly, per C-2 connection data
Crypto Service share of institutional volume	At or below 5% (C-8)	Monthly
Single merchant share of institutional volume	Below 4% without board notification	Monthly
Single MCC share of acquiring volume	At or below 20% without MLRO review	Monthly
Overdue periodic reviews	Below 3% of due reviews	Monthly, per SOP-22 data

6 · Application and attestation

Enforcement points: SOP-10 S1.3 at intake, SOP-15 at underwriting, SOP-22 at review, SOP-23 at exit. The declined, abandoned and exited registers make prohibitions durable across re-applications. Product owners attest annually that their products operate within this statement, as part of the section 13 control plan in GOV-02. Exceptions to section 2 do not exist at any level; a case for holding something prohibited is a case for the board to change this document, prospectively and on record. Restricted-category conditions are not negotiable per file; failing the condition means declining.

7 · Review

Reviewed with GOV-01 annually and on its event triggers. Metric performance is reported quarterly. Changes state their GOV-01 basis. Appetite shall not be widened ahead of the assessment that justifies it.
