

GOV-04: Customer risk appetite statement

FIELD	VALUE
Document ID	GOV-04
Owner	The board; proposed by the MLRO from GOV-01
Version	1.0; changes only by board decision
Enforced through	SOP-10 S1.3, SOP-15, C-6, C-7, C-8; declined register

1 · Purpose

This statement says what Mynta will and will not hold, in advance, so the decision is never made under commercial pressure at a single file. It binds onboarding, product decisions and review. Prohibited means declined, at whatever stage it is discovered, with no exception path at any level. Restricted means held only under the named conditions. The lists derive from GOV-01's assessment and the board's tolerance; changing them is a board decision through this document, never a file-level judgement.

2 · Prohibited

Mynta does not onboard, and exits on discovery:

- Shell banks, and institutions permitting their accounts to be used by shell banks.
- Unlicensed money-service businesses and unlicensed crypto-asset service providers, in any jurisdiction where their activity requires a licence.
- Entities with bearer shares, unless immobilised with a regulated custodian and evidenced to SOP-10 standards.
- Nominee shareholding or directorship arrangements without full disclosure of the principals to SOP-10 evidence standards.
- Entities whose ownership or control cannot be established to this framework's standards, per the GOV-02 section 7.7 prohibition.
- Any person or entity with prohibited-jurisdiction nexus per C-2, at any chain layer.
- Trusts and comparable foreign legal arrangements as acquiring customers; as account customers only with MLRO pre-approval per SOP-10 section 5.
- Business lines: unlicensed gambling; weapons, ammunition and dual-use trade; adult live-streaming services; sanctioned-sector activity per GOV-03.
- Anonymous products of any kind; no product is offered without completed due diligence.

3 · Restricted, held only under conditions

CATEGORY	CONDITION
Licensed gambling	Tier 1 licence jurisdictions only per C-7; licence verified and monitored; acquiring only with SOP-15 enhanced review
	Licence verified; purpose of relationship explicit; EDD; no downstream anonymity

Licensed PSPs, EMLs and MSBs

Crypto-sector businesses	Licensed only; EDD always; ramp access assessed separately per SOP-10 Appendix E; volume caps per section 4
Non-profit organisations	Case-by-case, MLRO decision; purpose, funding and corridor transparency required
Complex or cross-border structures	Held only with full chain evidence, C-3 lookthrough where high risk, EDD per C-9, MLRO authority per C-6
PEP relationships	Per SOP-10 section 8: MLRO plus senior-management approval, source measures, enhanced monitoring
Tier 3 nexus	EDD and MLRO decision always; corridor monitoring per SOP-18

4 · Product and concentration appetite

- **No cash.** Mynta operates no cash products or cash access beyond scheme-standard ATM issuance under SOP-16 limits.
- **Crypto bounds.** Ramp volume is capped at 5% of institutional processed volume and per-customer per risk class per C-8's register values; tokens are allowlisted per C-8 with additions only through GOV-09. Breaching a bound suspends ramp growth per GOV-01 conclusion C3.
- **Acquiring concentration.** No single merchant above 4% of institutional processed volume without board notification; no MCC category above 20% of acquiring volume without MLRO review of the concentration.
- **Corridor concentration.** Sustained corridor patterns inconsistent with the customer base's profile trigger review under SOP-18 and, where structural, a GOV-01 event review.
- **Combinations.** Where several rules apply, the strictest one wins. One combination is outside appetite entirely: a complex structure, plus a Tier 3 nexus, plus crypto-dominant expected activity.

5 · Appetite metrics

The bounds below quantify the statement and are monitored quarterly. Breach of a metric is reported in the MLRO report with a remediation path; sustained breach routes to the board.

METRIC	BOUND	MEASURED
High-risk share of active customers	At or below 6%	Quarterly, per SOP-14 class data
Tier 3 nexus share of active customers	At or below 1.5%	Quarterly, per C-2 nexus data
Ramp share of institutional volume	At or below 5% (C-8)	Monthly
Single merchant share of institutional volume	Below 4% without board notification	Monthly
Single MCC share of acquiring volume	At or below 20% without MLRO review	Monthly

Overdue periodic
reviews

Below 3% of due reviews

Monthly, per SOP-22 data

6 · Application and attestation

Enforcement points: SOP-10 S1.3 at intake, SOP-15 at underwriting, SOP-22 at review, SOP-23 at exit. The declined, abandoned and exited registers make prohibitions durable across re-applications. Product owners attest annually that their products operate within this statement, as part of the section 13 control plan in GOV-02. Exceptions to section 2 do not exist at any level; a case for holding something prohibited is a case for the board to change this document, prospectively and on record. Restricted-category conditions are not negotiable per file; failing the condition means declining.

7 · Review

Reviewed with GOV-01 annually and on its event triggers. Metric performance is reported quarterly. Changes state their GOV-01 basis. Appetite shall not be widened ahead of the assessment that justifies it.
