

REG-C: Rules and registers

Company	Mynta AB
Last approval date	2026-09-10
Approved by	Board of Directors
Document type	Register
Document owner	MLRO
Information class	Open internally, confidential externally

Versioning

DATE	VERSION	CHANGES	BY
2026-09-07	1.x	Earlier versions per the change notes in this document	Document owner
2026-09-10	2.0	Rewritten in plain language. No rules changed.	Document owner
2026-09-11	2.1	Values and structure calibrated per the expert pass: regimes named, freeze rule added, caps direction corrected, interim EDD controls, decision levels, board approval.	Head of Legal & Compliance review

This document holds the rule values the framework references and the shell of the monitoring rule register. Values here bind the routines that cite them. Changes follow the change authority stated per register.

C-1 · Registry evidence freshness

Value	Registry evidence shall be under 6 months old at the time of assessment, per layer. At periodic review: under 12 months, refreshed where the review raises questions.
Change authority	MLRO. Review at least annually.

C-2 · Jurisdiction categories

Composition rule: prohibited = (a) jurisdictions and territories that must be treated as prohibited under the sanctions regimes binding on Mynta, EU, UN as implemented in EU law, and Swedish national measures, per GOV-03 section 2, plus (b) board-decided exclusions beyond the legal minimum. Russia and Belarus sit in (b) as board decisions; Cuba reflects designated OFAC exposure only, not an EU or UN obligation, and is prohibited only on a separate board decision, per the GOV-03 three-way split. The high-risk category = EU high-risk third countries plus FATF lists plus board and MLRO additions. The elevated category = jurisdictions requiring extra checks based on actual risk. The standard category = all others. Snapshot as at 10 September 2026; the live list is maintained in the register with a source reference per entry.

BAND	ENTRIES (SNAPSHOT)	CONSEQUENCE
Prohibited		

	North Korea, Iran, Russia and Belarus; Crimea and Sevastopol; the non-government-controlled areas of Donetsk, Luhansk, Kherson and Zaporizhzhia. Cuba only on a separate board decision.	Decline the relationship, at any layer, whenever discovered. Sanctions are checked separately under GOV-03.
High-risk category	Afghanistan, Algeria, Angola, Bolivia, British Virgin Islands, Cameroon, Côte d'Ivoire, Democratic Republic of the Congo, Haiti, Kenya, Laos, Lebanon, Monaco, Myanmar, Namibia, Nepal, South Sudan, Syria, Trinidad and Tobago, Vanuatu, Venezuela, Vietnam, Yemen	EDD per SOP-13 and an MLRO decision, always.
Elevated category	Bosnia and Herzegovina, Bulgaria, Iraq, Kuwait, Papua New Guinea	Extra checks based on the actual risk. FATF grey-listing alone does not always require EDD. Countries may be added only after a documented Mynta risk assessment.
Standard category	All other jurisdictions	Normal handling per the routines.
Change authority	The MLRO updates the elevated and high-risk categories when official lists change, without undue delay and weekends included where a sanctions regime drives the change. The board decides changes to the prohibited list. The lists are reviewed at least quarterly.	

C-3 · Ownership structure documentation depth

Value	Standard: ownership structure documented to identify all persons above 25%. High risk: ownership structure documented from 10%, all paths.
Change authority	MLRO. Review at least annually.

C-4 · Screening the decision on hits

On a confirmed sanctions match, the relevant funds and assets are frozen immediately per SOP-21 and the matter is reported to the competent authority without delay. The customer is not notified. This applies whoever detects the match and at whatever stage.

Values	Similarity threshold 85%. First-line dismiss requires two or more mismatched secondary identifiers with recorded rationale. Secondary identifier order of weight: date of birth, nationality or registration country, personal or organisational number, address. Sanctions hits that cannot be dismissed are true matches for handling purposes.
Change authority	MLRO, with vendor test evidence per SOP-12 section 7.

C-5 · Escalation service levels

EVENT	STANDARD
Sanctions-linked, any source	Immediate. SOP-21 before analysis.
Urgent: active fraud, live risk to funds	First sorting and first action same business day.
Standard alert first-line review	Within 3 business days.
Escalation to senior analyst or MLRO	Reviewed within 24 hours of escalation.
S4.5 ownership discrepancy memo	Senior review within 24 hours of memo.
EDD completion targets	15 business days single trigger, 25 stacked, from complete referral. While EDD is pending, interim risk-mitigating controls apply per the risk: enhanced transaction monitoring, restricted services, or suspension until completion, chosen per SOP-13 and recorded.
Change authority	MLRO. Review annually against queue data.

C-6 · Decision authority

CLASS OR EVENT	DECIDES
Low risk	Analyst, or automated approval within SOP-11 S6.2.
Medium risk	Senior analyst.
High risk, all PEP files, all EDD-routed files	MLRO. All PEP files are decided by the designated senior executive per GOV-02.
Prohibited list	No authority at any level. Changes only by board decision through GOV-04.
Downward classification override	MLRO, registered, 12-month review cycle.
Change authority	Board, via GOV-02 or GOV-04.

C-7 · Acquiring MCC governance

BAND	CATEGORIES (SNAPSHOT)	CONDITION
Prohibited	Illegal or unlicensed businesses of any kind; weapons; illegal drugs; sexual services; scams and deceptive schemes; crypto-asset sales outside the approved arrangement; any GOV-04 section 2 business line	None. Decline.

Conditional	Licensed gambling (standard-category licence jurisdictions only); financial services; adult content; medicines and pharmaceuticals (licensed distance sellers); tobacco and nicotine; CBD; dating services; supplements; travel; marketplaces; high-value goods	Licence or programme conditions verified at underwriting; enhanced review per SOP-15; monitoring profile flagged.
--------------------	---	---

The MCC alone is never relied on. The real business, its licences and the card-scheme rules are checked against the category.

Change authority MLRO with GOV-04 consistency check. Board where a change widens appetite.

C-8 · Crypto approved list and caps

Approved list	BTC, ETH, USDC, EURC. Additions only through GOV-09 product approval.
Institutional cap	Crypto Service volume at or below 5% of institutional processed volume, measured monthly.
Per-customer monthly caps	Low risk SEK 400,000. Medium SEK 150,000. High SEK 50,000, or set individually in EDD.
Change authority	Board for the institutional cap. MLRO for per-class caps with GOV-01 basis.

C-9 · EDD triggers and designated adverse media

Triggers	Any PEP connection. Any the high-risk category connection. Ownership ownership structure of three or more layers, or any legal-arrangement layer. Expected or actual crypto share at or above 30% of activity. Confirmed designated adverse media. GOV-04 restricted categories where conditioned on EDD.
Designated adverse media categories	Money laundering, terrorist financing, fraud, corruption, organised crime, sanctions evasion.
Change authority	MLRO with GOV-01 basis. Board where a trigger is removed.

Monitoring rule register · shell and starter values

System of record for SOP-18 parameters. Fields per rule: ID, version, description, parameters per risk class, window, action, owner, status. Window direction: the window is the period within which related transactions are treated as one sequence; higher risk classes use longer windows, catching slower patterns. Starter values below are the calibrated set; the live register carries the full set including the rules not shown.

ID	PARAMETER	LOW	MEDIUM	HIGH	WINDOW	ACTION	OWNER	STATUS
R-ACC-01	Volume multiple of baseline	4.0x	3.0x	2.0x	7 days	Alert per SOP-18	Monitoring function	Active
R-ACC-02	In-out symmetry; min holding	90%; 24h	85%; 48h	80%; 72h	14 days		Monitoring function	Active

						Alert per SOP-18		
R-ACC-03	Cluster level; count	SEK 48,000; 4	SEK 48,000; 3	SEK 24,000; 3	10 days	Alert per SOP-18	Monitoring function	Active
R-ACC-05	the high-risk category cross- border flow value	SEK 25,000	SEK 10,000	any	single	Alert per SOP-18	Monitoring function	Active
R-ACC-06	Dormancy period; reactivation value	12 mo; SEK 40,000	9 mo; SEK 25,000	6 mo; SEK 10,000	single	Alert per SOP-18	Monitoring function	Active
R-CRD-01	ATM share of spend; count	60%; 10	45%; 8	30%; 5	30 days	Alert per SOP-18	Monitoring function	Active
R-ACQ-01	Settlement vs underwritten volume	2.5x	2.0x	1.5x	calendar month	Alert per SOP-18	Monitoring function	Active
R-ACQ-02	Chargeback rate, count basis	0.9%	0.7%	0.5%	rolling 30 days	Alert per SOP-18	Monitoring function	Active
R-ACQ-03	Refund ratio	8%	6%	4%	rolling 30 days	Alert per SOP-18	Monitoring function	Active
R-CRY-01	Crypto Service share of activity	30%	25%	per EDD	30 days	Alert per SOP-18	Monitoring function	Active
R-CRY-02	Convert-out within window	SEK 40,000; 24h	SEK 25,000; 24h	SEK 10,000; 48h	single	Alert per SOP-18	Monitoring function	Active
R-XR-01	Total level where no product area alerts	SEK 180,000	SEK 120,000	SEK 60,000	10 days	Alert per SOP-18	Monitoring function	Active
R-XR-02	Sequence completion time	72h	72h	7 days	sequence	Alert per SOP-18	Monitoring function	Active
R-XR-03	Combined cross- product area activity vs monthly baseline	4.0x	3.0x	2.0x	trailing 10 days	Alert per SOP-18	Monitoring function	Active

New-account regime: 90 days; parameters tightened one class step; first the high-risk category cross-border flow or Crypto Service use alerts at any value. Suppressions: per SOP-18 section 8, maximum duration 6 months, quarterly review.
