Information class	Open internally, confidential externally

Versioning

DATE	VERSION	CHANGES	BY
2026-09-07	1.x	Earlier versions per the change notes in this document	Document owner
2026-09-10	2.0	Rewritten in plain language. No rules changed.	Document owner

The institution's governing-document shelf. Status PUBLISHED means the document is included in the open benchmark pack; INTERNAL means it exists in the institution's universe, is referenced by published documents, and is not part of the open pack. Internal documents are maintained in the institution's document system with the same version discipline. Legal bases are recorded at instrument level in this register; provision-level mapping lives in the internal legal register.

Language: English is governing for the published pack. Swedish originals of governing documents are maintained in-universe per Swedish supervisory practice; where a case supplies Swedish source material, the English framework governs interpretation.

Financial crime prevention framework (published)

ID	TITLE	CATEGORY	OWNER	STATUS

Mynta Digital AB, CASP framework (separate entity, internal)

The affiliate maintains its own governing-document shelf under MiCA and Regulation (EU) 2025/305, including its programme of operations, custody and administration framework, transfer-services policy, market-abuse prevention, pricing and communications policies, sustainability disclosure procedure, and its own wind-down plan. That shelf is governed, versioned and supervised on the affiliate's side of the group boundary described in PROG-01 section 6, and is not part of this pack. The published interface documents are GOV-02 section 12, SOP-17 and REG-C C-8.

Register governance

The MLRO maintains this register. A published document is added, amended or retired only with a register entry; an internal document's existence claim is itself version-controlled here. On any conflict between a published document and an internal one on financial-crime matters, the published FCP framework governs.
