

Reviewer notes, addendum after the shelf review

Raised by the Head of Legal & Compliance review of the build list; resolved as follows, corrections welcome on each.

GOV-01A · Sanctions risk assessment

New annex closing the flagged gap. Wanted: exposure-path completeness for an EMI of this shape, the inherent and residual ratings, and the three acceptance conditions in section 4.

PROG-01 · Programme of operations

New canon-level document; FI-reads-this-first logic adopted. Wanted: whether the eight sections cover what a verksamhetsplan must, at reference depth, and anything materially missing for coherence.

REG-D · Document register

The full internal shelf from the review is now referenced: corporate governance, ERM, compliance policy and monitoring plan, fit and proper, conflicts, capital, accounting, ICT and DORA set, communications, audit, remuneration, complaints, whistleblowing, training, retention, reporting, wind-down, and the affiliate's CASP shelf as a separate entity boundary. Wanted: anything a Swedish EMI shelf carries that the register still lacks, and whether instrument-level legal references (kept deliberately without article numbers in the published register) are the right disclosure level.

Stubs v1.1

Four referenced-but-absent stubs added: complaints, whistleblowing, training, retention. Wanted: binding-point accuracy.

Positions taken

English is canonical for publication; Swedish originals exist in-universe, and Swedish source material becomes a difficulty feature in cases. The MiCA operating system is asserted by register reference, not authored; the affiliate boundary is stated in PROG-01 section 6. Page-count is explicitly subordinated to coherence, per the review's own principle.
